PROFESSIONAL SUMMARY

Entry-level Software Engineer with a strong foundation in Computer Science, Java application development, SQL databases, Linux basics, and software testing. Hands-on experience in writing, testing, and integrating application code while following Software Development Life Cycle (SDLC) best practices. Proven ability to translate business requirements into technical solutions, execute test plans, and support stable, high-quality software systems. Highly motivated to contribute to payment processing, transaction systems, and enterprise-scale financial platforms at Euronet Worldwide.

CORE SKILLS

- Application Development (Java, C++ – Academic)
 - SQL & Relational Database Concepts
 - Software Development Life Cycle (SDLC)
 - Manual & Functional Testing
 - Test Case Design & Execution
 - Linux Fundamentals
 - Debugging & Defect Resolution
 - Object-Oriented Programming (OOP)
 - Requirement Analysis & Documentation
 - Financial Transactions & Payment Systems (Foundational)
-

TECHNICAL SKILLS

Programming Languages: Java (Primary), C++ (Academic), .NET (Conceptual)

Databases: SQL (Oracle SQL)

Operating Systems: Linux (Basics), Windows

Testing: Manual Testing, Functional Testing, Test Plan Execution

Tools & IDEs: Git, GitHub, Visual Studio Code, IntelliJ IDEA

PROFESSIONAL EXPERIENCE

Software Engineer Intern – Application Development & Testing

Vangrove Tech Pvt. Ltd. | Dec 2024 – May 2025

- Wrote, tested, and integrated Java application code to deliver assigned features in line with business requirements.
 - Developed and optimized SQL queries to support backend and transaction-oriented applications.
 - Executed functional and regression testing, ensuring software stability, quality, and adherence to specifications.
 - Assisted in translating business requirements into technical components and design documentation.
 - Debugged application issues and collaborated with developers to resolve defects efficiently.
 - Gained exposure to production support workflows, implementation processes, and structured SDLC practices.
-

PROJECT EXPERIENCE

Job Portal Application – Java & Oracle SQL

- Designed and developed backend application modules using Java and JDBC.
 - Created and executed test cases to validate functionality, data accuracy, and system behavior.
 - Designed normalized relational database schemas to ensure data integrity and consistency.
 - Strengthened understanding of enterprise application development, integration, and testing.
-

Electricity Theft Detection System – Academic Project

- Performed data preprocessing, validation, and result verification.
 - Assisted in evaluating system outputs and testing model accuracy.
 - Developed analytical thinking and structured problem-solving skills.
-

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering

Vignana Bharathi Institute of Technology, Hyderabad

Aug 2020 – May 2024

CGPA: 6.73

CERTIFICATIONS

- Database Foundations – Oracle Academy

- Java Programming Fundamentals – Infosys Springboard
 - AI-ML Virtual Internship – AICTE
 - AWS Academy Cloud Foundations
-

ADDITIONAL INFORMATION

- Strong interest in payment systems, transaction processing, and financial technology platforms
- Comfortable working across development, testing, implementation, and production teams
- Quick learner with strong analytical and debugging skills
- Willing to adapt and grow in high-availability, enterprise-scale environments
