

RAHUL PODISHETTY

Associate Engineer Software | Java | SQL | Entry-Level Software Developer

Email: rahull543210@gmail.com | Phone: 7702661760 | Location: India

PROFESSIONAL SUMMARY

Entry-level Software Engineer with strong fundamentals in computer science, hands-on experience in Java development, debugging, and collaborative software delivery. Experienced in working with mentors, participating in code reviews, writing clean and documented code, and contributing to real-world projects. Motivated to grow in agile, product-based environments and deliver high-quality, scalable software.

TECHNICAL SKILLS

Programming Languages: Java, SQL

Core CS Fundamentals: OOP, Data Structures (Basic), Algorithms, Debugging, Problem Solving

Software Development: Clean Code, Code Reviews, Version Control (Git/GitHub), Agile/Scrum

Tools & Platforms: Eclipse, Visual Studio Code, Jupyter Notebook, GitHub, Google Sheets

Operating Systems: Windows

PROFESSIONAL EXPERIENCE

Software Engineer Intern – Vangrove Tech Pvt Ltd | Dec 2024 – May 2025

- Contributed to Java-based software modules under guidance of senior engineers.
- Modified existing codebase, fixed defects, and improved code quality following best practices.
- Participated in code reviews, stand-ups, and sprint discussions.
- Assisted in debugging issues, analyzing logs, and documenting solutions.
- Collaborated with cross-functional teams to deliver tasks within defined timelines.

Java Developer Intern – InnoByte Services | Oct 2025

- Developed features for a Java-based application using Core Java and OOP principles.
- Wrote clean, reusable, and well-documented code.
- Worked closely with mentors to troubleshoot issues and optimize performance.
- Gained exposure to real-world development workflows and agile practices.

ACADEMIC & PERSONAL PROJECTS

Electricity Theft Detection in Smart Grids | Python, Machine Learning

- Built a CNN–Random Forest hybrid model to detect electricity theft from smart meter data.
- Preprocessed datasets, trained models, and evaluated performance metrics.
- Strengthened analytical thinking, debugging, and data-driven problem solving.

Online Quiz Application | Java

- Designed and implemented a Java-based quiz system with scoring and validation logic.
- Applied exception handling, modular design, and clean coding standards.
- Simulated real-world feature delivery and user-facing functionality.

Sentiment Analysis Using Naïve Bayes | Python

- Developed a text classification system to analyze user sentiment.
- Cleaned datasets and improved model accuracy through tuning and evaluation.

EDUCATION

Bachelor of Technology – Computer Science & Engineering

Vignana Bharathi Institute of Technology, Hyderabad | Aug 2020 – May 2024

CGPA: 6.73

Intermediate — Narayana Jr. College, Hyderabad (89%)

CERTIFICATIONS

- AI-ML Virtual Internship – AICTE
- Java Programming Fundamentals – Infosys Springboard
- Python Programming Fundamentals – Infosys Springboard
- Database Foundations – Oracle Academy
- AWS Academy Cloud Foundations
